HERO

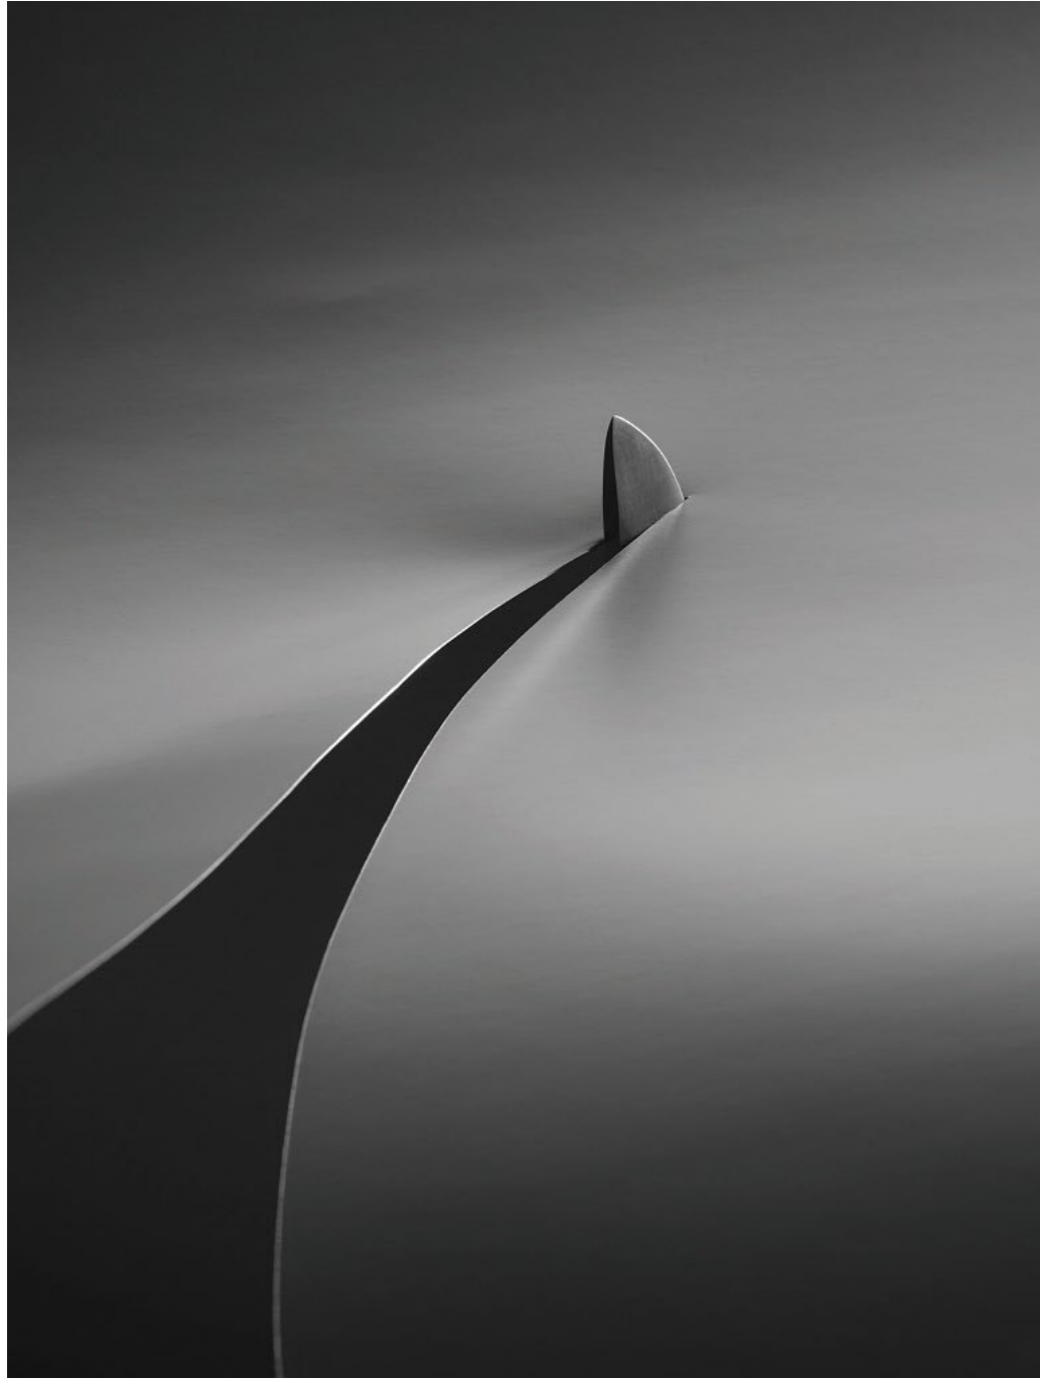

A shark is approaching the sea surface and then leaves traces with its fin and dives again, leaving the inspiration trigger to the designer for Hero chairs.

Hero chairs adopted bionics design with the armrest featured by a shark fin, which integrates the power and tension of sharks with the progressive characteristics of its users. The large plastic back panel and metal arm rest make the chair modern and stylish.

Duple smoothness

A smooth leather upholstery is attached on the armrest to eliminate the coldness and stiffness of pure metal. Let it be any angle, only softness and harmony of material can be felt by user's hands.

"CHAIR" YOU UP

Chair adjustment is a science of ergonomics and humanization. Tilt angle, lumbar support, base height, and seat depth adjustment had been thoroughly considered in Hero chair design. Essentially, the chair should unreservedly serve the human body and each of its postures.

Hero chairs are designed with an enlarged seat with a 58mm adjustable seat depth which better caters to different body sizes. Relaxed sitting helps free your mind.

Sit down for gripped imagination

Two versions differ in back thickness are available for each of executive chairs, staff chairs, and visitor chairs. With comprehensive analysis of space needs and user requirements, each of the Hero chairs knows the right place to go.
